

Enterprise Solutions: Manufacturing

Location : Malaysia

Industry : Manufacturing

Customer Background

One of the world largest electronics plant in the northern states of Malaysia

Business Need

The plant in Malaysia relies heavily on the flawless operation of their network. Unfortunately, they were experiencing network problems and not finding out about them immediately. Our client knew they needed a strong network monitoring solutions to proactively react and rectify any problems arising.

Solution

CBS successfully implemented a comprehensive Network and Security Management Software. This solution is a combination of Paymate™, ASG Sentry and Intrusion Detection System (IDS).

The final solution enables the customer to proactively manage all their critical Servers and Network Devices (locally and remotely) to ensure optimum productivity with minimal downtime. The customer chose CBS' solution because of its simple (user-friendly) and yet powerful features. Most importantly CBS was able to provide the most comprehensive solution and the a quick implementation
